

Produktdeklaration - DGNB Neubauversion Büro- und Verwaltungsgebäude (NBV15)
MANUFACTURER VG-ORTH GmbH & Co.KG

PRODUCT NAME MultiGips MP 100 light

Product Rating DGNB Criteria

- The product fulfills the requirements of action level 1 to 4 and contributes to achieve 10 (of max. 10) criterion points within Criterion 06 'Risks for the regional environment'.
- The product has a federal Environmental Product Declaration (EPD), which can be used for the life cycle assessment according to criteria 'ENV 1.1' and 'ENV2.1'.

Criterion ENV 1.2 Risks for the Local Environment - Ecological Quality
Quality Level 1 10 Checklist Points

Quality Level 2 50 Checklist Points

Quality Level 3 75 Checklist Points

Quality Level 4 100 Checklist Point

Criterion ENV 1.3.1 Sustainable Resources - Ecological Quality*
Quality Level 1 10 Checklist Points

Quality Level 2 50 Checklist Points

Quality Level 3 100 Checklist Points

* This criterion is only applicable to wooden materials.

Product Characteristics

MultiGips MP 100 light is a particularly efficient pre-mixed dry mortar on proven gypsum basis with special light aggregates acc. DIN EN 13279-1. MultiGips MP 100 light suitable for aerated concrete, lime sandstone, pumice, concrete stone, mix masonry or porous bricks due to the fact that it is extensively adjusted to the specific properties concerning absorbency and substrate conditions. Application acc. DIN EN 13914-2 und DIN 18550-2. Field of application: As single coat machine plaster for walls and ceilings, particularly light and efficient. Applicable on all common sturdy plaster substrates.

Credit requirements fulfilled - the action level is achieved

Credit is not applicable to this product

22% X% of the product comply with the credit requirement

About DGNB Products - www.dgnb.de

This declaration helps to assess products easily according the certification system DGNB® Neubauversion Büro- und Verwaltungsgebäude (NBV15). Products are not reviewed or certified by DGNB. DGNB credit requirements cover the performance of materials in aggregate, not the performance of individual products or brands. Therefore the project team or the manufacturer is responsible to declare the compliance with the project requirements to achieve DGNB points.

Above you find an explanation of the symbols. Detailed information are on the next pages.

Product assessment of complete system

Topic	Number	Criteria	Relevance	Evaluation
Environmental Quality (ENV)	ENV1.1	Life cycle Assessment - Emissions	✓	An Environmental Product Declaration (EPD) does exist for this product
	ENV1.2	Local environmental impact	✓	Quality Level 4 is fulfilled
	ENV1.3.1	Responsible procurement (Wood)		
	ENV1.3.3	Responsible procurement (Natural Stone)		
	ENV2.1	Life cycle Assessment - Primary Energy	✓	An Environmental Product Declaration (EPD) does exist for this product
	ENV2.2	Potable water demand and wastewater volume		
	ENV2.3	Land Use		
Economic Quality (ECO)	ECO1.1	Building-related life-cycle costs		
	ECO2.1	Suitability for conversion		
	ECO2.2	Marketability		
Sociocultural and Functional Quality (SOC)	SOC1.1	Thermal Comfort		
	SOC1.2	Indoor Air Quality		
	SOC1.3	Acoustic Comfort		
	SOC1.4	Visual Comfort		
	SOC1.5	Occupant control		
	SOC1.6	Quality of stay outdoor / indoor		
	SOC1.7	Safety		
	SOC2.1	Access for all		
	SOC2.2	Public access		
	TEC1.2	Noise protection		
	TEC1.3	Building envelope quality		
	TEC1.4	Adaptability of Technical Systems		
	TEC1.5	Ease of cleaning and maintenance		
	TEC1.6	Ease of dismantling and recycling		
	TEC3.1	mobility infrastructure		
Process Quality (PRO)	PRO1.1	Project preparation and planning		
	PRO1.3	Conceptual design and optimization in the planning		
	PRO1.4	Sustainability aspects in tender phase		
	PRO1.5	Documentation for Facility Management		
	PRO1.6	Design and urban quality		
	PRO2.1	Environmental impact of construction		
	PRO2.2	Construction quality assurance		
	PRO2.3	Systematic commissioning		
Site Quality (SITE)	SITE1.1	Site location risks		
	SITE1.2	Public image and social conditions		
	SITE1.3	Access to transportation		
	SITE1.4	Access to specific-use facilities

Product assessment for criteria ENV1.2 - Local environmental impact

The product fulfills the requirements for Quality Level 1-4

 Assessment: **Quality Level 4**
Goals and Relevance

Certain materials, construction products and preparations are a risk for soil, air, groundwater and surface water as well as for human's health, flora and fauna. In order to minimize risks for humans and the local environment, materials, (construction) products and preparations need to be reduced ,avoided or substituted, which due to their material properties or ingredients are a risk for surface and ground water, soil or air. Especially those materials, (construction) products and preparations must be reduced ,avoided or replaced, which affect human health, flora and fauna or harm within a short-, medium / or long-term period . This affects the entire life cycle - from production, processing at site, use of (building) inventory and disposal (dismantling, recycling, landfilling). These local risks are assessed material and product related. Hence eco-and human toxicological impact categories of LCA can not be applied due to lack of evaluation and measurement procedures.

Product Assessment

Relevant Products	Requirements of Quality Levels	Assessment of Product	Evaluation
There are no requirements for the product.			

Other remarks on classification

The product falls strictly speaking not under DGNB requirements. The product contributes to achieve quality level 4.
